PROJECT

Autonomous WebAgent – AI Based Intelligent Web Task Automation

Python, LangChain, Web Automation, LLM APIs

- Developed an autonomous AI agent capable of performing web-based tasks automatically using natural language instructions.
- Integrated LLM APIs to interpret user queries and generate task execution plans.
- Built an intelligent workflow enabling the agent to search, extract, and summarize web data autonomously.

IntelliLab – Smart AI-Based Laboratory Management System

Next.js (App Router), TypeScript, Tailwind CSS, Node.js, Express.js, MongoDB

- Built reusable React components using hooks and proper state management
- Implemented server and client components using Next.js App Router
- Designed responsive and accessible UI using Tailwind CSS
- Developed REST APIs for managing lab records, reports, and user data
- Integrated async data fetching with proper loading and error handling
- Implemented role-based authentication (Admin/Staff/User) using JWT
- Structured MongoDB database schema for efficient lab data management
- Deployed frontend on Vercel and backend on Render

HireMind AI – AI-Native Recruiting Operating System

React (Vite), Node.js, Express.js, Tailwind CSS, OpenAI API

- Built a full-stack AI recruiting platform that learns hiring preferences and automatically sources, screens, and ranks candidates.
- Developed an AI-driven candidate matching engine using skill overlap, experience similarity, and culture alignment scoring.
- Implemented AI screening assistant to generate interview questions, simulate responses, and evaluate candidates with technical, communication, and culture-fit scores.
- Designed a modern SaaS-style HR dashboard with candidate pipelines, analytics charts, and adaptive learning that improves matching after each hire.
